

# TK 6

## Features / Benefits

- \* Capable of directly communicating with Allen-Bradley SLC-500 based platforms
- \* 25% lighter than earlier design
- \* Raised “lip” to protect switches
- \* Smaller ergonomic design
- \* New internal connectors that endure greater shock
- \* LCD display of battery voltage
- \* Completely sealed design
- \* Stainless steel screws with sealing O-rings
- \* New internal battery design with flush mounted access door
- \* One (1) piece aluminum case with reinforced corners
- \* Low profile switches for protection
- \* Rubber mounted internal circuit boards
- \* Improved antenna: sealed - one-piece - fixed mounted
- \* Utilizes a frequency synthesized module vs. a tuned crystal
- \* Operating range of approximately 900 feet
